- 1.7 Troubleshooting

Registration at a Glance

Requirements for each account type before and after signup.

Role	How to start	Code / approval	After signup
Student	Register as a student with profile, school, and class details	Teacher or guardian connection code required	Account is linked to the adult who issued the code; the student can sign in

Student Guide

1.1 Student Registration: Step-by-Step

How Registration Works

Students must register with a **valid teacher or guardian connection code**. This is required so every student account is linked to a responsible adult.

Process Overview

Choose Student Role > Enter Profile + School Details > Add Connection Code > Create Account > Login and Start Learning

Steps

1. Open Soraha and choose **Student** during sign-up.
2. Enter your:
 - full name
 - email
 - password
3. Select your school (or create if allowed in your flow).
4. Choose curriculum and class/grade, then confirm subjects.
5. Enter a valid **connection code** from your teacher or guardian.
6. Accept required terms/consent checkboxes and submit.

Where to Get the Parent/Guardian Code

If you are joining through a parent/guardian:

1. Your parent/guardian creates a **Guardian** account first.
2. Soraha generates a guardian **connection code** for them after registration.
3. Your parent/guardian shares that code with you.
4. You enter that code during student sign-up.

This adult-linked code is required to complete registration successfully.

What Happens After Signup

- Your account is created and linked to the adult behind that connection code.
- You can log in and access assignments and practice content available to your profile.
- Your progress becomes visible in connected learning/monitoring flows.

Important Notes

- If the connection code is wrong or expired, registration will fail until a valid code is used.

- Keep your login credentials private and secure.
- Use the same email you intend to use for future login and support.

1.2 Connect with Your Teacher

Your teacher will provide you with a connection code to link your accounts.

Steps to Connect

1. **Get the Code:** Ask your teacher for their connection code
2. **Enter the Code:** In your dashboard, go to "Connect" tab
3. **Verify Connection:** You should see your teacher's name appear

Connection codes are short alphanumeric codes, for example T3A4C7H9. Enter the code exactly as given.

What Happens After Connection

Once connected to your teacher:

- You'll see their name in your dashboard
- You can access assignments they create
- Your progress will be visible to them
- You can communicate about your learning

Troubleshooting Connection Issues

Can't connect to teacher?

- Verify the connection code is correct
- Check your internet connection
- Contact your teacher for a new code
- Make sure you're using the latest version of the app

1.3 Access Assignments

Once connected to your teacher, you can access and complete assignments.

Finding Assignments

1. **Check Dashboard:** Look for new assignments in your dashboard
2. **Assignment Codes:** Your teacher will provide access codes for specific assignments
3. **Due Dates:** Pay attention to assignment deadlines

Playing Assignments

1. **Start Playing:** Tap on an assignment to begin
2. **Complete Questions:** Answer all questions in the assignment

3. **Submit Answers:** Make sure to submit before the time limit
4. **View Results:** See your score and feedback immediately

Assignment Features

- **Timed Sessions:** Most assignments have time limits
- **Multiple Attempts:** Some assignments allow retries
- **Instant Feedback:** Get immediate results and explanations
- **Progress Tracking:** Your performance is recorded and shared with your teacher

Tips for Success

- Read questions carefully before answering
- Manage your time effectively
- Don't rush through questions
- Review your answers before submitting

1.4 Playing Games

Soraha offers three different game modes to suit your learning needs.

Assignment Mode

Access: Use assignment codes provided by your teacher **Features:**

- Tracked progress
- Teacher visibility
- Detailed analytics
- Graded results

Requirements: Must be connected to a teacher

Singleplayer Mode

Access: Available anytime from your dashboard **Features:**

- Practice questions
- Offline play capability
- Personal progress tracking
- Subject-specific content

Subjects: Choose from Mathematics, English, Science, and more

Anonymous Mode

Access: No account required **Features:**

- Basic gameplay
- Local progress only
- No registration needed

- Quick practice sessions

Limitations:

- No progress saving
- No teacher assignments
- Limited features

Game Features

- **Interactive Questions:** Engaging multiple-choice and open-ended questions
- **Visual Elements:** Images and diagrams to enhance learning
- **Progress Indicators:** See your progress through each session
- **Achievement System:** Earn badges and certificates for good performance

1.5 Tracking Progress

Monitor your learning journey with comprehensive progress tracking.

Learning Progress

The **Your learning progress** panel compares your accuracy now with when you started each subject. It uses your first three and latest three scored sessions in the same subject, and appears once you have completed at least four sessions in a subject. Playing often builds the habit; this panel shows what you have learned.

Dashboard Overview

Your dashboard shows:

- **Recent Activity:** Last 10 game sessions
- **Performance Metrics:** Average scores, completion rates
- **Achievements:** Badges and certificates earned
- **Streaks:** Daily learning consistency

Analytics

View detailed analytics including:

- **Subject Performance:** How you're doing in each subject
- **Trend Analysis:** Performance over time
- **Weak Areas:** Topics that need more practice
- **Strengths:** Subjects where you excel

Progress Metrics

Key Performance Indicators

- **Average Score:** Your overall performance across all sessions
- **Completion Rate:** Percentage of sessions completed

- **Time Spent:** Total learning time
- **Accuracy:** Percentage of correct answers

Subject Breakdown

- **Mathematics:** Performance in math-related content
- **English:** Language and literacy skills
- **Science:** Scientific knowledge and reasoning
- **Other Subjects:** Performance in additional subjects

Setting Goals

1. **Review Your Performance:** Check your current metrics
2. **Identify Weak Areas:** Focus on subjects that need improvement
3. **Set Targets:** Aim for specific score improvements
4. **Track Progress:** Monitor your improvement over time

1.6 Tips for Success

Maximize your learning potential with these proven strategies.

Study Habits

1. **Play Regularly:** Consistent practice improves performance
2. **Set a Schedule:** Dedicate specific times for learning
3. **Create a Routine:** Establish consistent study habits
4. **Stay Focused:** Minimize distractions during study time

Learning Strategies

1. **Review Mistakes:** Learn from incorrect answers
2. **Understand Concepts:** Don't just memorize answers
3. **Ask Questions:** Contact your teacher if you need help
4. **Practice Regularly:** Consistent practice builds skills

Goal Setting

1. **Set Realistic Goals:** Aim for achievable improvements
2. **Track Progress:** Monitor your improvement over time
3. **Celebrate Achievements:** Acknowledge your successes
4. **Stay Motivated:** Keep your learning goals in mind

Getting Help

1. **Teacher Support:** Reach out to your connected teacher
2. **Peer Learning:** Study with classmates when possible
3. **Parent Guidance:** Ask guardians for support
4. **Online Resources:** Use additional learning materials

Common Challenges

Difficulty with certain subjects?

- Focus extra time on challenging topics
- Use singleplayer mode for additional practice
- Ask your teacher for specific guidance

Losing motivation?

- Set smaller, achievable goals
- Celebrate small victories
- Remember why you're learning

1.7 Troubleshooting

Common issues and their solutions.

Connection Issues

Can't connect to teacher?

- Verify the connection code is correct
- Check your internet connection
- Contact your teacher for a new code
- Restart the app and try again

Connection keeps failing?

- Ensure you have a stable internet connection
- Check if your teacher's account is active
- Contact support if the problem persists

Assignment Problems

Assignment not loading?

- Ensure you're connected to the teacher who created it
- Check your internet connection
- Try refreshing the app
- Verify the assignment code is correct

Can't submit answers?

- Check your internet connection
- Ensure you haven't exceeded the time limit
- Try refreshing and submitting again
- Contact your teacher if the issue persists

Progress Issues

Progress not saving?

- Make sure you're logged in
- Check your internet connection
- Ensure you're using the latest app version
- Contact support if the issue persists

Scores not updating?

- Wait a few minutes for data to sync
- Refresh your dashboard
- Check your internet connection
- Contact support if scores don't appear

App Issues

App crashing or freezing?

- Close and restart the app
- Check for app updates
- Restart your device
- Contact support if problems continue

Slow performance?

- Close other apps to free up memory
- Check your internet connection speed
- Restart your device
- Update to the latest app version

Getting Help

If you continue to experience issues:

1. **Contact Your Teacher** : They can help with assignment-related problems
2. **Check Support Resources**: Visit our help center
3. **Contact Support**: Reach out to our technical support team
4. **Report Bugs**: Help us improve by reporting issues
